

Sheen Devil™

Super buoyant oil and sheen boom

Contains and removes oil sheen from all water surfaces

Infused with patented Mycel x which binds to hydrocarbons and allows water to pass through freely

Available in 10 foot Interconnecting units

Lightest of all booms—easy to deploy and retrieve.

Unlike booms of melted blown polypropylene, the Mycelx infused Sheen Devil binds to and absorbs hydrocarbons but does not retain water. At only 1 pound per 10 feet, the Sheen Devil is easy to deploy and retrieve.

The Sheen Devil comes in interconnecting 10 foot sections and can be used to span bodies of water by simply anchoring at each end. Each Sheen Devil has integral lengths of rope and snap hooks that are used with built in grommets for connection purposes.

Spill responders also have the option of dragging the Sheen Devil between two vessels to clean contaminated waters.

To order the Sheen Devil, 8-SD1, call Centek Industries at 229-228-7653. For more information visit www.centekindustries.com and check under environmental products.
