

The Most Area Per Pound Of Any Product Available

**CEN
TEK
Versimat**

Versimat is infused with patented chemistry rendering it highly absorbent to oil and repellent to water. A sweep or boom only absorbs oil where it contacts the oil / water interface. The Versimat has been designed to maximize effective contact area and minimize weight. This maximizes performance while reducing water drag and waste disposal costs. It's large surface contact area, the largest square footage per pound of any product available, allows it to immediately absorb much more effectively than standard sweep / boom products. Versimat is designed for bulk sorption of light to medium oils. Each 10 foot section of Versimat can be used as a sweep, but it's versatile design allows it to be easily attached together to form a continuous barrier of absorbent protection. Excellent for use on gasoline, diesel fuels, hydraulic fluids, light oils and medium oils, as well as crude oils.

Technical Data

Size: 55" x 10 ft
 Configuration: Absorbent Mat on Rope with
 Connectors at Each End
 Contact Area: 45.8 ft²
 Weight: 2.8 lbs.
 Oil Capacity: 60-120 gal.

Materials Absorbed

Diesel Fuel	Kerosene
Gasoline	Hydraulic Fluids
Transmission Fluid	Organic Solvents
Oil API 10-45	Crude Oil
Animal Fats & Oils	

Benefits

- Versimat instantly attaches to oil
- Prevents weathering and separation on contact
- Versimat is triboelectrically inactive and will not generate static charge
- Environmentally safe
- Minimizes waste generation
- Easily incineratable
