BILGEKLEEN™

FOR REMOVAL OF OIL AND GAS FROM BOAT BILGE WATER

Patented **BILGEKLEEN** System

The **BILGEKLEEN** system utilizes patented MYCELX technology to provide total protection in the bilge. The system includes a patented MYCELX Hydrocarbon Removal Matrix (**HRM™**) cartridge, a filter housing, and a SmartPad. The specially designed cartridge removes oil, gas, diesel fuel and other hydrocarbons from the bilge water as it is discharged overboard, while the SmartPad is placed in the bilge sump area to capture the harmful contaminants where they form.

Patented system that easily installs to your bilge pump discharge line for the removal of gas and oil pollution

- Two types of protection - one for the bilge sump and one for the bilge discharge
- Simple, easy and automatic
- Prevents oil and gasoline sheen from escaping
- Stop unnecessary hydrocarbon pollution
- Quick connect hose for installation
- Scavenges oil and gas in bilge
- Environmentally friendly
- Reduces combustible fumes
- Excellent for spill prevention
- Prevents sheen in dock

Part Numbers:

8-BK-1 BilgeKleen - Standard 10" version

8-MBK-1 Mini BilgeKleen - 5" version (for limited space applications)
